Experience

Sapiens **July 2023 – Present**

Developer *TypeScript, React.js, Next.js, Styled Components, MUI, Jest, RTL, Nx, Docker*

- **UI Library & Design System:** Lead adoption of the new *sapiens-component-kit* in the monorepo, establishing a functional, accessible, and extensible design system. Improve development consistency, reduce accessibility issues by 80%, and accelerate feature delivery across product teams.
- **No-Code UI Platform:** Engineer modular, configuration-driven UI components enabling no-code feature rollouts. Empower product teams to customize layouts with minimal engineering effort, increasing development velocity by 35%.
- **Vital Signs Health App:** Spearhead integration of Binah (Node.js module) for extracting vital signs via facial video input. Build reusable React hooks and a front-end app to deliver real-time health insights, reducing manual data capture by 60%.
- **Global Search Module:** Design a high-performance Global Search with debounced queries, multi-source data integration, and relevance-based ranking. Improve search response time by 40%.
- **Real-Time Notifications:** Develop a notification component using SWR with optimized long polling and interval management, cutting API load by 25% while delivering instant updates.
- **Accessibility Enhancements:** Resolve accessibility gaps in images, interactive elements, modals, navigation, and automated scans. Achieve 80% reduction in accessibility errors and improve WCAG compliance.

Puresoftware Pvt Ltd **Jan 2021 – Jun 2023**

Senior Software Engineer *JavaScript, React.js, Node.js, Oracle, PostgreSQL, Zustand, Jest, npm*

- **Sequelize-Oracle Integration:** Engineered Oracle DB compatibility for Sequelize ORM, enabling CRUD operations, indexing, complex joins, and grant management. Expanded interoperability across mission-critical systems and reduced manual query handling by 50%.
- **Test Coverage:** Refactored and validated 2,000+ Sequelize test cases, ensuring Oracle DB compliance. Reduced regression risks by 40% and improved release confidence.
- **Migration Project:** Led migration of enterprise applications to the enhanced Sequelize-Oracle integration, improving query performance by 30% and reducing maintenance overhead.
- **Code Quality & Mentorship:** Conducted code reviews, enforced best practices, and mentored juniors, improving maintainability and productivity.

Automatic Data Processing, Inc. (ADP) **Aug 2018 – Dec 2020**

Member Technical *React.js, Node.js, MongoDB, PostgreSQL, Tailwind CSS, Zustand, AWS*

- **Payroll Platform API:** Built and maintained scalable API endpoints with Node.js and Express, supporting 10K+ daily payroll transactions.
- **Time & Attendance Dashboard:** Designed RESTful APIs and optimized performance with caching, query tuning, and refactoring. Reduced API response times by 35%.
- **Reusable UI Library:** Developed responsive, reusable components with React.js and Tailwind CSS. Managed state with Redux, reducing UI bugs by 25%.
- **Testing:** Implemented unit/integration tests with Jest, achieving 85%+ coverage and reducing regression defects.
- **Agile Practices:** Participated in sprint planning, daily standups, and code reviews, contributing to a 20% improvement in sprint velocity.

Technical Skills

- **Languages & Databases:** TypeScript, JavaScript, SQL, MongoDB, PostgreSQL, Oracle
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Zustand, Redux, Tailwind CSS, MUI, Styled Components, SWR
- **Tools & Platforms:** Git, Docker, Nx, Jest, Storybook, ESLint, Jira, AWS (EC2, Lambda, ECS) , Azure

Education

Baba Farid College Of Engineering And Technology, Bhatinda **Aug 2014 – Jun 2018**

B.Tech. Computer Science and Engineering *CGPA: 9.2/10*
