Summary

Software Engineer with 8+ years of experience specializing in React.js, Next.js, TypeScript, and Node.js in scalable frontend architecture, reusable UI systems, and AI-assisted development workflows. Experienced in building and maintaining enterprise web applications and driving cross-application engineering initiatives.

Experience

Best Buy **Dec 2025 – Present**

Senior Software Engineer *TypeScript, React.js, Next.js, Less, Jest, RTL, Nx, Redux*

- **Migrated a React SPA to Next.js 16:** Re-architected an application onto the App Router with server-rendered routes, improving LCP by **40%** (3.2s to 1.9s) and simplifying routing and data fetching.
- **Established an OpenSpec-Driven Repository:** Introduced AI-assisted code generation for Loyalty frontend applications, standardizing implementation patterns and accelerating development workflows.
- **Led Best Buy Rebranding:** Drove icon, pricing display, and shared UI component updates across applications.
- **Architected an Internal Debugging and Polling Platform:** Built self-serve tools to inspect accounts, loyalty points, and certificates (diagnosis time ∼**10 min** to **¡1 min**) and a poll module to publish, edit, and update polls.

Sapiens **July 2023 – Dec 2025**

Developer *TypeScript, React.js, Next.js, Styled Components, MUI, Jest, RTL, Nx, Docker*

- **UI Library & Design System:** Led adoption of *sapiens-component-kit* across apps, building an accessible, extensible design system that standardized UI and sped up delivery across product teams.
- **Accessibility Enhancements:** Resolved gaps in images, interactive elements, modals, and navigation, reducing accessibility errors by **80%** and improving WCAG compliance.
- **Vital Signs Health App:** Integrated Binah to capture vital signs from facial video, building reusable React hooks and a real-time insights UI that cut manual data entry by **60%**.
- **Global Search Module:** Designed a high-performance global search with debounced queries, multi-source integration, and relevance-based ranking, improving response time by **40%**.
- **Real-Time Notifications:** Built a notification component using SWR with optimized long polling.

Puresoftware Pvt Ltd **Jan 2021 – Jun 2023**

Senior Software Engineer *JavaScript, React.js, Node.js, Oracle, PostgreSQL, Jest, npm*

- **Sequelize-Oracle Integration:** Engineered Oracle support for Sequelize ORM (CRUD, indexing, joins, grants), enabling interoperability across mission-critical systems and cutting manual queries by **50%**.
- **Test Coverage:** Refactored and validated **2,000+** Sequelize test cases, ensuring Oracle DB compliance. Reduced regression risks by **40%** and improved release confidence.
- **Migration Project:** Led migration of enterprise applications to the enhanced Sequelize-Oracle integration, improving query performance by **30%** and reducing maintenance overhead.

Automatic Data Processing, Inc. (ADP) **Aug 2018 – Dec 2020**

Member Technical *React.js, Node.js, MongoDB, PostgreSQL, Tailwind CSS, Redux, AWS*

- **Payroll Platform API:** Built scalable API endpoints with Node.js and Express, supporting **10K+** daily payroll transactions.
- **Time & Attendance Dashboard:** Designed RESTful APIs and optimized performance with caching, query tuning, and refactoring, reducing API response times by **35%**.
- **Reusable UI Library:** Developed responsive, reusable components with React.js and Tailwind CSS. Managed state with Redux, reducing UI bugs by **25%**.

Technical Skills

- **Languages & Databases:** TypeScript, JavaScript, SQL, MongoDB, PostgreSQL, Oracle
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express, Redux, Zustand, Tailwind CSS, MUI, Styled Components, Less, SWR
- **Tools & Platforms:** Git, Docker, Nx, Jest, React Testing Library, ESLint, AWS, Azure
